PEDIATRIC NEUROLOGY
Subject Index Volume 34

Acidemia, metylmalonic, neuropathology of, 156
ADHD and Sydenham's chorea, and brain magnetic resonance spectroscopy, 467
Agenesis of the corpus callosum, 186,
Antiepileptic drugs
  In a pregnancy with a neural tube defect, 323
  Nonepileptic uses in children and adolescents, 421
Apnea, sleep, in a child with autism spectrum disorder, 325
Arachnoid cyst, quadrigeminal cistern, and Kabuki syndrome, 478
Artery dissection, bilateral traumatic carotid, 408
Ataxia, type 6
  Episodic: relationship to infantile spinocerebellar ataxia type 6, 301
  Infantile spinocerebellar: relationship to episodic ataxia type 6, 301
Attention-deficit hyperactivity disorder, and serum ferritin, 200
Autism
  Immune activation in, 333
  Infantile, and compulsive masturbation treated by mirtazapine, 417
Autism spectrum disorder, and impact of treating sleep apnea, 325
Baclofen coma, and magnetic resonance spectroscopy and electroencephalography, 151
Book Reviews
  Epilepsy and the ketogenic diet: Carl E. Stafstrom and Jong M. Rho/ Editors, 79
  The Capute Scales: P.J. Accardo and A. J. Capute/ Editors, 79
  The epilepsies: seizures, syndromes, and management: C.P. Panayiotopoulus/Author, 80
  Young adult and pediatric headache management: Paul Winner and Donald W. Lewis/Editors, 419
Botulinum toxin type A
  For the treatment of the spastic equinus foot in cerebral palsy, 106
  Low- and high-dose: a retrospective study, 285
Brain, developing, and translational stroke research, 459
Brain drug resistance map, new proteins configuring, in tuberous sclerosis, 20
Brain injury, traumatic, and critical score of Glasgow Coma Scale, 379
Carotid artery dissection, bilateral traumatic, 408
Celiac disease, associated with opsoclonus-myoclonus, 312
Cerebral infarction and hemorrhage in children with moyamoya disease, 400
Cerebral palsy
  And botulinum toxin type A for the treatment of the spastic equinus foot, 106
  And pharmacotherapy of spasticity, 1
Cerebrospinal fluid shunts
  Failure by obstruction and mechanical failure, 83
  Failure by overdrainage, loculation, and abdominal complications, 171
Chiari I malformation, inheritance in a family, 481
Cholestatic infant with optic nerve hypoplasia and growth hormone deficiency, 319
Clinical trials in children, how are they implemented?, 436
Clonazepam, misleading effects of, in symptomatic electrical status epilepticus during sleep syndrome, 146
Cognitive function, everyday, after craniopharyngioma, 13
Coma
  Baclofen, and MRS and EEG, 151
  Minor head trauma-induced sporadic hemiplegic migraine, 329
Concussion, descriptive epidemiology of, 376
Corneal clouding, an infrequent ophthalmic manifestation of mitochondrial disease, 464
Cortical resection for polimicrogyria, mirror movements following in a child with intractable epilepsy, 135
Corticosteroids in the treatment of acute Sydenham's chorea, 168
COX and SURF-1 mutation in Leigh syndrome, and facial dysmorphism, 486
Craniopharyngioma, and everyday cognitive function after, 13
Cytomegalovirus infection, congenital, and retrospective diagnosis using umbilical cord, 415
De Novo mutations, recurrent, of *SCN1A* in severe myoclonic epilepsy of infancy, 116
Dentato-olivary dysplasia and neonatal rigid-akinetic syndrome, 132
Diazepam, rectal, vs intranasal midazolam in acute childhood seizures, 355
DNA depletion, mitochondrial, and new mutations in TK2 gene, 177
Down syndrome, and pattern of increased cerebral FDG uptake, 270
Duchenne muscular dystrophy, and risk for reading disabilities in males, 296
Dysmorphism, facial, in Leigh syndrome with SURF-1 mutation and COX, 486
Dysplasia complex, septo-optic: a heterogeneous malformation syndrome, 66
Electrical status epilepticus during sleep syndrome, symptomatic, and misleading effects of clonazepam, 146
Electroencephalography and magnetic resonance spectroscopy in baclofen coma, 151
Electroencephalography, amplitude-integrated: for monitoring silent seizures in neonates, 194
Encephalitis or encephalopathy, and serial changes on diffusion-weighted MRI, 308
Encephalopathy
  Acute infantile, predominantly affecting the frontal lobes, 93
  Acute necrotizing,
    Associated with hemophagocytic syndrome, 315
    Associated with human herpes viruses 6 infection, 160
  Hypertension-induced cerebellar, and hydrocephalus, 72
  Neonatal
    And prognostic value of ^{1}H-MRS, 360
    And moderate hypothermia, 169
  Or encephalitis, and serial changes on diffuse-weighted MRI, 308
Enteroviral infection, and vestibular neuritis, 45
Epidermoid, parapontine, and hemihypotrophy, coexistent, 499
Epilepsy
  And efficacy and safety of zonisamide monotherapy, 351

Intractable, and mirror movements following cortical resection of polymicrogyria, 135
Severe myoclonic, De Nova mutations of *SCN1A*, 116
Syndromes in infancy, 253
Evoked potentials study, multimodal, in neurofibromatosis type 1 of childhood, 276
Face stimuli, upright and inverted, magnetoencephalographic response to, and Williams syndrome, 412
FDG uptake, increased cerebral, in Down syndrome patients, 270
Filum terminale, tight, and Miller-Dieker syndrome, 228
Folinic-acid responsive seizurs initially responsive to pyridoxine, 164
Frontal lobes, predominantly affected by acute infantile encephalopathy, 93
Gene mutation in spinal muscular atrophy respiratory type I, 474
Glasgow Coma Scale, critical score of, for pediatric traumatic brain injury, 379
Glucose hypermetabolism, focal, in interictal state of West syndrome, 47
Growth hormone deficiency and optic nerve hypoplasia in a cholestatic infant, 319
Guillain-Barré and immune thrombocytopenic purpura, and immunoglobulin, 60
Headache, and characterization of symptoms of sleep disorders, 7
Headaches, recurrent, prevalence and characteristics in Turkish adolescents, 110
Head trauma-induced sporadic hemiplegic migraine coma, 329
Hemicrania, chronic paroxysmal, 225
Hemihypotrophy and parapontine epidermoid, coexistent, 499
Hemiparesis, recurrent, due to anterior mitral leaflet myxomas, 490
Hemophagocytic syndrome, associated with acute necrotizing encephalopathy, 315
Hemorrhage,
Intraventricular, and neurodevelopmental outcome, 219
Predisposing to cerebral infarction in children with moyamoya disease, 400
Herpes virus-6 infection, human, associated with acute encephalopathy, 160
Heterotopia, bilaterial periventricular nodular, and steroid sulfatase deficiency, 239
Hydrocephalus, and hypertension-induced cerebellar encephalopathy, 72
Hyperphosphatasia with neurologic deficit: a pyridoxine-responsive seizure disorder?, 303
Hypohidrosis during topiramate treatment: a rare and reversible side effect, 392
Hypomelanosis of Ito associated with precocious puberty, 51
Hypoplasia, optic nerve, and growth hormone deficiency in a cholestatic infant, 319
Hypothermia, moderate, in neonatal encephalopathy, 169
Hypothyroidism, central, with oxcarbazepine therapy, 242
IGHMBP2 gene, a new mutation, 168
IL-6 and TNF-α in the diagnosis of bacterial and aseptic meningitis, 25
Immune activation in autism, 333
Immunoglobulin for concurrent Guillain-Barre and immune thrombocytopenic purpura, 60
Infantile spasms
After perinatal stroke, outcomes of children with, 291
Interictal state, and focal glucose hypermetabolism, 47
Kabuki syndrome, and quadrigeminal cistern arachnoid cyst, 478
Klippel-Feil syndrome, and monozygotic twins, 76
Leigh syndrome with SURF-1 mutation and COX, and facial dysmorphism, 486
Leukemia
Acute lymphoblastic, and level of tau protein, 367
And facial paralysis as a presenting symptom of, 502
Leukoencephalopathy syndrome, pediatric posterior reversible, and NSAID-induced tubular interstitial nephritis, 245
Levetiracetam in a neonate with malignant migrating partial seizures, 55
Magnetic resonance spectroscopy
And electroencephalography in baclofen coma, 151
Brain, in Sydenham's chorea and ADHD, 467
Magnetic stimulation, lumbar, in newborns with spina bifida, 101
Magnetoencephalographic response to upright and inverted face stimuli in a patient with Williams syndrome, 412
Masturbation, compulsive, in infantile autism treated by mirtazapine, 417
Megalencephaly and dilated Virchow-Robin spaces, monitored by MRI and PMRS, 35
MELAS phenotype, demonstrated in an infant with a mitochondrial A3243G mutation, 235
Meningitis, bacterial and asceptic, TNF-α and IL-6 in diagnoses of, 25
Methylmalonic acidemia, neuropathology of, 156
Midazolam, intranasal, vs. rectal diazepam in acute childhood seizures, 355
Midbrain and thalamus in Reye syndrome, 405
Migraine coma, minor head trauma-induced sporadic hemiplegia, 329
Miller-Dieker syndrome associated with tight filum terminale, 228
Mirror movements following cortical resection of polimicrogyria in a child with intractable epilepsy, 135
Mirtazapine treatment for compulsive masturbation in infantile autism, 417
Mitochondrial A3243G mutation demonstrating the MELAS phenotype, 235
Mitochondrial disease
And corneal clouding, 464
Genetic , and peripheral neuropathy, 127
Mitochondrial DNA depletion, and new mutations in *TK2* gene, 177
Mitochondrial encephalomyopathies and muscular dystrophies, myostatin expression in, 281
Mitochondrial respiratory chain disorders, epidemiology, 204
Mongolian spots, extensive: a clinical sign merits special attention, 143
MRI,
And proton magnetic resonance spectroscopy of megalencephaly and dilated Virchow-Robin spaces, 35
Diffusion-weighted, serial changes on in encephalitis or encephalopathy, 308
Moyamoya disease, hemorrhage predisposing to cerebral infarction in children with, 400
Muscular dystrophies and mitochondrial encephalomyopathies, myostatin expression, 281
Muscular dystrophy, Duchenne, in males, are they at risk for reading disabilities?, 296
Myostatin expression in muscular dystrophies and mitochondrial encephalomyopathies, 281

Myxomas, anterior mitral leaflet, and recurrent hemiparesis, 490
Nephritis, NSAID-induced acute tubular interstitial, and posterior reversible leukoencephalopathy syndrome, 245
Neural tube defect in a pregnancy, and antiepileptic drugs, 323
Neuritis, vestibular, caused by enteroviral infection, 45
Neurofibromatosis type 1, and utility of multimodal evoked potential study, 27
Neurologic deficit with hypophosphatasia: a pyridoxine-responsive seizure disorder?, 303
NSAID-induced acute tubular interstitial nephritis, and pediatric posterior reversible leukoencephalopathy, 245
^{1}H-MRS, prognostic value in neonatal encephalopathy, 360
Opsoclonus-myoclonus associated with celiac disease, 312
Oxcarbazepine therapy for central hypothyroidism, 242
Paralysis, facial, as a presenting symptom of leukemia, 502
Parkinsonism, secondary, a rare complication after radiotherapy, 495
Peripheral neuropathy in genetic mitochondrial diseases, 127
Pharmocotherapy of spasticity in children with cerebral palsy, 1
Phenobarbital, very high-dose, for childhood refractory status epilepticus, 63
Polymicrogyria, cortical resection of, in a child with intractable epilepsy, and mirror movements following, 135
Prednisone, and randomized double-blind study, in Sydenham's chorea, 264
Proton magnetic resonance spectroscopy and MRI of megalencephaly and dilated Virchow-Robin spaces, 35
Psychosis, postictal, 388
Puberty, precocious, associated with Hypomelanosis of Ito, 51
Pyridoxine, and folinic acid- responsive seizures, 164
Pyridoxine-responsive seizure disorder, hyperphosphatasia with neurologic deficit?, 303
Radiotherapy, and secondary Parkinsonism as a rare complication, 495
Reading disabilities, risk in males with Duchenne muscular dystrophy, 296
Rett syndrome, incidence in France, 372
Reye syndrome, thalmus and midbrain in, 405
Rigid-akinetic syndrome, neonatal, and dentato-olivary dysplasia, 132
Schizencephaly, open lipped, and tuberous sclerosis, 231
SCN1A, recurrent De Nova mutations of, in severe myoclonic epilepsy of infancy, 116
Seizure disorder, pyridoxine-responsive, hyperphosphatasia with neurologic deficit, 303
Seizures
  Acute childhood, treatment by intranasal midazolam vs rectal diazepam, 355
  Febrile, in Southern Chinese children: incidence and recurrence, 121
  Folinic acid-responsive, initially responsive to pyridoxine, 164
  Malignant migrating partial, and levetiracetam, 55
  Silent, monitored by amplitude-integrated electroencephalography, 194
Septo-optic dysplasia complex: a heterogeneous malformation syndrome, 66
Serum ferritin in children with attention- deficit hyperactivity disorder, 200
Shunts, cerebrospinal fluid
  Failure by obstruction and mechanical failure, 83
  Failure by overdrainage, loculation, and abdominal complications, 171
Sickle cell disease, 450
Simpson-Golabi-Behmel syndrome, expanding the clinical picture of, 139
Sleep apnea, impact of treating in a child with autism spectrum disorder, 325
Sleep disorders, characterization of symptoms in, and headache, 7
Smith-Magenis syndrome (del 17p 11.2), neurologic and developmental features of, 337
Spastic diplegia, a clinical and etiologic profile, 212
Spastic equinous foot in cerebral palsy, treated with botulinum toxin type A, 106
Spasticity, pharmacology of, and cerebral palsy, 1
Spectral analysis, amplitude, of theta/alpha/beta waves in preterm infants, 30
Spina bifida, and responses to lumbar magnetic stimulation, 101
Spinal muscular atrophy respiratory distress type I, and gene mutation, 474
Spinocerebellar ataxia type 6, infantile, relationship to episodic ataxia type 6, 301
Status epilepticus
  Childhood refractory, and very-high-dose phenobarbital, 63
  Electrical, during sleep syndrome, symptomatic, and misleading effects of clonazepam, 146
  Treated, and stimulation-sensitivity, 334
Steroid sulfatase deficiency with bilateral periventricular nodular heterotopia, 239
Stimulus-sensitivity in treated status epilepticus, 334
Streptococcal ventriculitis, group B, 395
Stroke
  Initiatives and preliminary studies, 439
  Pediatric, opportunities and challenges in planning clinical trials, 433
  Perinatal, and infantile spasms, 291
Stroke research, translational, in the developing brain, 459
Stoke trials, adult, lessons from, 446
SURF-1 mutation, COX and Leigh syndrome, with facial dysmorphism, 486
Sydenhams' chorea
  Acute, corticosteroids in treatment of, 168
  And ADHD, and brain magnetic resonance spectroscopy, 467
  And randomized double-blind study with prednisone, 264
Tau protein, level in children treated for acute lymphoblastic leukemia, 367
Thalmus and midbrain in Reye syndrome, 405
Theta/alpha/beta waves, amplitude spectral analysis, 30
Thrombocytopenic purpura, immune, and Guillain-Barré, and immunoglobulin, 60
TK2 gene, new mutations associated with mitochondrial DNA depletion, 177
TNF-α and IL-6 in the diagnosis of bacterial and aseptic meningitis, 25
Topiramate treatment and hypohidrosis: a rare and reversible side effect, 392
Torticollis, congenital muscular: evaluation and classification, 41

Tuberous sclerosis
New proteins configuring a brain drug resistance map, 20
With open lipped schizencephaly, 231
Twins, monozygotic, discordant for Klippel-Feil syndrome, 76
Umbilical cord, and retrospective diagnosis of congenital cytomegalovirus infection, 415
Venous thrombosis, deep cerebral, 248
Virchow-Robin spaces, dilated, and megalencephaly, monitored by MRS and PMRS, 35
West syndrome
And perinatal stroke, 291
Interictal state and focal glucose hypermetabolism, 47
Williams syndrome, and magnetoencephalographic response to upright and inverted face stimuli, 412
Zonisamide monotherapy, efficacy and therapy in a cohort of children with epilipsy, 351
